

AquaRite and TurboCell are available in three sizes:

- 40,000 gallons (151,000L)
- 25,000 gallons\* (94,000L)
- 15,000 gallons\* (56,000L)

\*Minimum software requirement 1.50

### AquaRite & AquaRite XL In-Ground Salt Chlorination

The advantages of AquaRite & AquaRite XL automatic salt chlorine generation over traditional factory-produced chlorine are too numerous to list. Here are just a few of the benefits:

#### Enhanced Swimming Experience

- Soft, silky-smooth water
- No more red eyes, itchy skin
- No chlorine odor
- No bleaching of clothing or toys

#### Increased Safety

- Reduces handling and storage of toxic chemicals
- No harsh shockings necessary
- Even, consistent chlorine dispersion; no more unhealthy highs and lows
- No caustic or harmful byproducts
- NSF, CUL and UL approved

#### Reduced Maintenance and Costs

- Minimal maintenance. More leisure time
- User-friendly monitor system with LED service alerts
- Easy to use – one dial adjusts chlorine output
- Low operating costs
- No need for additional plumbing or parts

#### Added Convenience

- Perfect for new or existing pools and spas

## Convenience. Performance. Innovation.

## GOLDLINE® AquaRite® & AquaRite® XL SALT CHLORINATION

The World's #1  
Salt Chlorinator

SANITIZATION

Total System: Pumps | Filters | Heating | Cleaners  
Sanitization | Automation | Lighting | Safety

Never buy, mix, measure or store old-fashioned chlorine again.

Forget about mixing, measuring or messing around with harsh liquid or tablet chlorine. Say goodbye to red eyes, itchy skin, heavy chemical odors and the bleaching of toys and clothes. Now there's an easier, more efficient and cost-effective way to satisfy 100% of your sanitization needs and enjoy pool water that's always clean, clear and luxuriously soft.

#### **A little salt goes a long way.**

AquaRite® & AquaRite XL use advanced electrolytic technology to convert a small amount of ordinary salt – one teaspoon per gallon of pool water – into a virtually endless supply of fresh, pure chlorine. The process can produce up to 1.45 pounds of chlorine a day – enough to satisfy the sanitization requirements of pools up to 40,000 gallons (151,000L). And since the salt doesn't wear out or evaporate, you rarely have to add more.

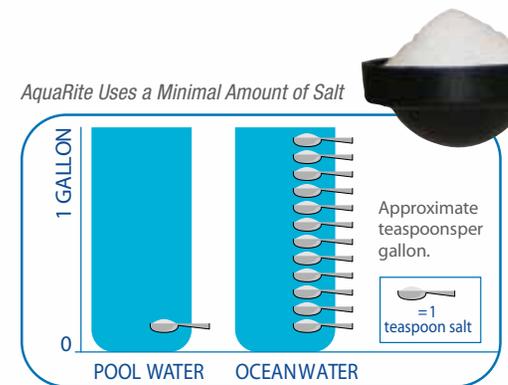

#### **The science behind the technology.**

There are two components to AquaRite: the control box and its patented TurboCell, a specially designed electrolytic converter that installs on your system's return line, behind the pump, filter and heater.

As pool water passes through the TurboCell, an extremely safe electrical charge generated by the control box automatically converts the dissolved salt into fresh, pure chlorine. The water is then dispersed evenly throughout the pool by the return jets. Each time the water is recirculated, the salt-based chlorine gets recharged and the cycle is repeated.

#### **Right-sized salt chlorination.**

AquaRite comes with a choice of TurboCell, the cells come in three sizes – 40,000 (151,000L), 25,000 (94,000L) and 15,000 gallons (56,000L). The sizes enable you to right-size your system for the most efficient and cost-effective chlorination possible. These cells are based on the proven TurboCell technology that made Hayward the leader in salt chlorination. They automatically generate a self-renewing supply of fresh, pure chlorine – for water that's clean, clear and luxuriously soft.

IT'S AMAZING WHAT A LITTLE SALT CAN DO TO ENHANCE YOUR POOL EXPERIENCE.
