

EVAC PRO™ by HAYWARD®

ROBOTIC POOL CLEANER

Cleans pool floor *and* walls with computer efficiency. This feature-packed floor and wall cleaner delivers performance, high efficiency, and a robot design at an attractive price.

Application

- In-ground residential pools/vinyl, gunite, fiberglass

Features

- Cleans pool floors *and* walls!
- Easy top access – no turning the cleaner over to empty, allows quick debris removal and easy cleanup
- 2 fine porosity filter elements – just remove and rinse with a garden hose
- 3 hour cleaning cycle – calculates the size of the pool and programs itself for the most time and energy efficient pattern
- 60 ft. of cord
- Saves you money. Uses up to 94% less electricity than pressure cleaners
- Out-of-water sensor (cleaner will not start if out of water and connected to a timer)
- Beach entry sensor (cleaner detects when it is climbing out of the water and reverses direction)
- 2-year warranty
- Optional clean-up filter elements for large debris removal available
